ADHD and the College Student: The Everything Guide to Your Most Urgent Questions

Susan Arnold

Journal of the American Academy of Child & Adolescent Psychiatry
January 2016Volume 55, Issue 1, Pages 81–82

Abstract
As increasing numbers of high school students diagnosed with attention-deficit/hyperactivity disorder (ADHD) pursue higher education, the disorder is estimated to affect 2% to 8% of the college student population and accounts for approximately 25% of students receiving disability support services on campus. Patricia Quinn’s book ADHD and the College Student provides a close look at ADHD’s impact on college student performance. As an experienced developmental pediatrician, she does not mince words.
