ClinicalTrials.gov Identifier:
NCT03175185

First received: June 1, 2017
Last updated: NA
Last verified: June 2017
History: No changes posted

Purpose
The aim of this study is to carry out a psychological evaluation for the parents of children diagnosed with attention deficit hyperactivity disorder (ADHD) and parents of children without ADHD as control to detect any psychological problems in those of children with ADHD. These problems may be a precipitating factor to cause ADHD in their child or have a genetic predisposition to be passed to their children. On the other hand, these psychological problems may be caused by the difficulties they encounter in raising their ADHD child. The exact relation needs more researches and to be more investigated.

Eligibility

Ages Eligible for Study: 20 Years to 60 Years (Adult)
Sexes Eligible for Study: All
Accepts Healthy Volunteers: Yes
Sampling Method: Probability Sample

Study Population
The people participating in this study will be 100 parents of 50 children who were diagnosed with ADHD and 100 parents of 50 children who are ADHD free as a control group recruited from outpatient clinic of Assiut University hospital.

Criteria

Inclusion Criteria:

- Parents of children diagnosed with ADHD according to the American Psychiatric Association's Diagnostic and Statistical Manual (DSM-V).
- Children are between 4 and 16 years of age for both sexes.
- Children with normal IQ > 70%.
- Parents are able to give informed consent and able to complete the research assessments.

Exclusion Criteria:
- Parents having chronic debilitating diseases e.g. chronic liver cirrhosis.
- Parents were participating in other clinical research.
- Refusal to participate.

**Contacts and Locations**
Choosing to participate in a study is an important personal decision. Talk with your doctor and family members or friends about deciding to join a study. To learn more about this study, you or your doctor may contact the study research staff using the Contacts provided below. For general information, see [Learn About Clinical Studies](#).

No Contacts or Locations Provided

**More Information**

Responsible Party: Mohammed Osman Mohammed Elnady Ellisy, Dr, Assiut University
ClinicalTrials.gov Identifier: NCT03175185
Other Study ID Numbers: 17100221
Study First Received: June 1, 2017
Last Updated: June 1, 2017

Individual Participant Data
Plan to Share IPD: Undecided

Studies a U.S. FDA-regulated Drug Product: No
Studies a U.S. FDA-regulated Device Product: No

Additional relevant MeSH terms:
- Attention Deficit Disorder with Hyperactivity
- Hyperkinesis
- Attention Deficit and Disruptive Behavior Disorders
- Neurodevelopmental Disorders
- Mental Disorders
- Dyskinesias
- Neurologic Manifestations
- Nervous System Diseases
- Signs and Symptoms
